Memorials

The following pages show samples of the memorials we have to offer. Where possible we have used pictures of existing memorials in the Cemetery to illustrate the different types. You are welcome to look round the Cemetery at any time to help your decision.

The prices quoted include delivery to the Cemetery and installation in the Cemetery. We have kept delivery costs to a minimum by using a stonemason close to one of our normal journeys. The smaller memorials are installed free of charge but the larger ones include an installation fee as we have to use the masons to bring and erect them.

Delivery times vary but are in the order of 6-8 weeks for most memorials. The wait is mostly due to the time the memorials take to get to the mason from the main factory. Once there they will be engraved without delay.

Memorial 1, the black granite plaque should be available within 2 weeks as we hold the blank plaques in stock. This is one of the best value memorials that will last well and be delivered quickly without exceptional cost.

The prices are for the memorials only and you have to add on the cost of engraving. The different types of engraving are on the following page and are charged per letter. The exceptions to this are the painted slate memorials (13 & 14) which include the lettering and flower design. The painted slate plaques last very well in the outdoors and are very good value. However, delivery times can be a little erratic.

Please note that the Cemetery is a wooded area and therefore marble memorials will get dirty quickly and will need regular cleaning to keep them in good condition.

Prices quoted are correct at the time of printing but may be subject to change if our suppliers prices alter.

PHOTO PLAQUES

Your photos are put onto porcelain and fired in a kiln in excess of 900 degrees C. They have a lifetime guarantee against fading (except for any gold filets).

Photos can be altered on computer and backgrounds removed if required. The end result will depend on the quality of the original photograph.

Colours may not always be exactly the same as the original photo due to the firing process.
